Acrylic and Cabinet Colour Options

In addition to Optix XL Acrylic's excellent gloss and colour retention, surfaces are naturally impervious to microbes. The non-porous nature of Aristech's acrylic defends against the penetration and subsequent growth of microorganisms on its surface. Oasis Spas are shielded against microbes, easy to clean and durable.

Optional Upgrades

GECKO IN.TOUCH

The ultimate wireless controller for your spa. In.Touch allows you to access the functions and features of your spa, even if you are away from home. Notifications keep you informed on the status of your spa. Allowing you to control your spa from your phone or tablet. **Pro & Elite Only*

ULTRA ZONE SANITISATION

UltraZone combines Ozone generation with UV-C sterilisation. A powerful oxidiser inactivating bacteria, burning off unwanted organic matter, leaving your spa water safe and clean whilst reducing your normal sanitiser usage by up to 70%.

GECKO IN.STREAM STEREO

Streamed from your spa, your favorite music never sounded so good! Designed to deliver clean, crisp rich sound in the high-fidelity rendition expected by music lovers, in.stream features Class D amplifier technology to enhance your outdoor audio experience.

Ready for use, all year round!

Are you looking for the most energy efficient way of heating your spa? Compared to gas or electric heaters, an air sourced heat pump uses a small amount of energy to generate a large amount of heat output. This energy efficient alternative can save you up to 75% on heating costs.

Apart from heating your swim spa more efficiently in the cooler months, it also works to cool your water down to a more refreshing temperature in summer. Available from 5.99kW to 12.02kW we have a model to suit every Oasis swim spa.

Adaptive flow control at your fingertips

After years of development and testing, Oasis Swim Spas have introduced new patented swim jet technology to our entire Oasis Swim Spa range with the 3-inch Turbo Swim Jet.

Our Turbo Swim Jets have a smooth continuous flow, with the resistance required to provide an unparalleled swimming experience. Combined with our superior Japanese made inverter system offering 10 speed variants for differing swimming styles and abilities, Oasis Spas has created the best swim experience available.

Swimming on the spot is made possible due to resistance against a continuous strong and smooth water flow. To swim properly, you need powerful pumps and unrestricted swim jets. Precise swim jet positioning is also necessary so the water flow targets the body for maximum resistance.

Most swim spas use smaller round swim jets, which can be good for a targeted resistance but these create a harsh flow which reduces the swim experience. Others use wide blade jets which create a smoother effect; however these jets lack the power required for strong resistance.

Indulge in the Ultimate Swimming Experience

PATENTED TURBO SWIM JETS POSITIONED FOR MAXIMUM RESISTANCE

Oasis revolutionary patented 3 inch turbo swim jets provide a powerful yet smooth resistance for an unparalleled swimming experience.

Correct jet positioning is crucial. Our swim jets target the shoulders and chest to create maximum resistance. Low or wide jets just waste water flow.

Some brands run two swim jets off one pump, causing neither jet to work properly. All Oasis swim spas have one pump for each swim jet.

EXERCISE HANDRAIL AND EXERCISE BAND

- Great for teaching kids how to swim
- Create your own aqua aerobics workout
- Attach the exercise band to the handrail and use it for arm, shoulder and leg exercises.

SWIM POLE SWIM SYSTEM

- Fantastic alternative swim system
- Great for kids, less experienced swimmers and aerobic training
- Self correcting - swim fast, slow, left or right - No need to be a great swimmer or keep "in the zone"

SUPERIOR SWIM SPA TECHNOLOGY

- The standard height models have a stand-up massage wall*
- Our Elite swim spa system creates a powerful, yet smooth water flow for the ultimate swim spa experience
- Our "Extra Depth" swim spa range offers deeper water for a better bathing and swimming experience.

* Pro and Elite models only.

Features

INSULATION SYSTEM

- High density 25mm thick insulation on shell
- Insulated cladding plus insulation layer on sides of cabinet
- Wrap-around ABS base plus insulation at ground level
- Insulated lockable hardcover to further keep heat in

HEAT PUMP/GAS HEATER READY

- All plumbing and connections in place
- Just connect a heat pump to the plumbing and start saving up to 75%
- Integrated heat pump technology - Control your heat pump with your spa touch pad*

GECKO CONTROL SYSTEM*

- Full color interface
- Select and activate maintenance reminders
- Menu-driven interface to set, configure and control all spa functions
- Seamless integration with connected accessories like In.Touch and In.Stream.

FEATURES

- Swim Pole System*
- Exercise Band*
- Stainless Steel Jet Trims
- Hand Rail
- LED Lighting & Backlit Controls*
- Easy Care Ozone System

PREMIUM COMPONENTS

- Premium "Gecko" equipment*
- Larger stainless steel heaters for long life and quicker heat up times*
- Touch screen color display on Pro and Elite models is simple to learn and use

THICKEST SHELL ON THE MARKET

- 8-10mm thick fiberglass shell with American made Lucite/Aristech acrylic surface
- 6 layer laminated construction for strength
- Shell strength is especially important in swim spas as the water alone will weigh 6-10 tonnes

* Pro and Elite models only.

WRAP AROUND ABS BASE

- A wrap-around ABS base seals the spa to keep out cold air and pests
- The ABS base also keeps the frame away from the weather
- This base allows us to insulate the spa at ground level to stop heat loss through the base

SUPER TOUGH CONSTRUCTION

- Super strong galvanised steel frame
- Engineered to support the sides of the spa and every seat to stop stress and flex on the shell
- All welds treated with multi-stage "cold gal" protection

PREMIUM BEARING-LESS SPA JETS

- The spa jets spin on a floating stainless steel shaft, means no bearings to clog or fail
- Tough PVC and stainless steel construction for long life and resistance to chemicals
- Easy to remove - just screw them out
- Our jets are self cleaning - so they don't need maintenance and will never stop spinning

CABINET

- Made from UV protected synthetic timber
- No sanding or oiling required
- Just spray the cabinet with a hose if it's dirty

EASY CARE TECHNOLOGY

- Water maintenance is simple with our handy after-spa clean up cycle*
- Stainless steel heater element
- Control your spa from anywhere with our Wi-Fi and stereo option

OZONE WITH BOOST CHAMBER

- Automatically kills germs and breaks down body oils for reduced chemical usage
- Patented mixing chamber maximises ozone efficiency and protects you and your spa

FILTRATION

- Huge 100 square foot, 2 cartridge filtration system maximises filtration and water clarity
- Our larger filter system also means you won't need to clean your filters as often
- Our anti-microbial filter system means less chemical is needed

** Pro and Elite models only.*
